Depending upon the circumstances of your loss, our estimate may or may not include an amount for general contractor's overhead and profit. If you have questions regarding general contractor's overhead and profit and whether the services of a general contractor are appropriate for your loss, please contact your claim representative before proceeding with repairs.

Because your house was built prior to 1978, you need to be aware of the following: To protect against risk of lead paint, on April 22, 2008, the EPA issued a rule requiring the use of lead safe practices and other actions aimed at preventing lead poisoning. Under the rule, beginning in April 2010, contractors performing renovation, repair and painting projects that disturb lead-based paint in homes built before 1978 must be certified and must follow specific work practices to prevent lead contamination. In the event of a covered loss, we will allow the reasonable cost associated with specific work practices outlined by the EPA or local authority. These costs will be considered once they are incurred and submitted for our review.
