Net Claim	\$11,904.26

Ryan Shaw
Adjuster

Depending upon the circumstances of your loss, our estimate may or may not include an amount for general contractor's overhead and profit. If you have questions regarding general contractor's overhead and profit and whether the services of a general contractor are appropriate for your loss, please contact your claim representative before proceeding with repairs.

Any person who, with intent to defraud or knowing that he is facilitating a fraud against an insurer, submits an application or files a claim containing a false or deceptive statement is guilty of insurance fraud.

This document includes a damage estimate for your property based on Replacement Cost Value (RCV) and Actual Cash Value (ACV). The ACV estimate reflects the RCV less the amount of any depreciation. Depreciation is the decrease in value of an item due to the item's condition, which takes into consideration age, life expectancy, usage, type of item, and market factors. As your adjuster has explained, depending on your policy, you may be able to recover your depreciation upon your repair or replacement of the covered damages.

During the claim process, we asked for your assistance in establishing the age and condition of your damaged items. If you have any questions regarding the age and condition applied to your property, or any other questions regarding this estimate, please contact your adjuster.

Specialized skill, licensing or certification may be needed of any contractor(s) that you retain, for instance, to identify the presence and nature of any potential contaminants, toxins, pollutants, or other hazards that may be encountered during the course of the work, or to utilize appropriate work practices and procedures during the course of the work. Check with your local or State public health or environmental agency regarding potential hazards, including contractor qualifications and other requirements. For your safety, it is prudent to avoid areas where damaged structures, materials or unknown substances may be present, and to not disturb such structures, material, or unknown substances until your contractors have inspected the work site.

The suggestions above are provided only for your consideration. They in no way supplement, alter or modify your existing coverage. Your insurance policy is the legal contract that contains the terms and limitations of your coverage.

If you have any concerns about the grade of flooring on your estimate, you may take advantage of a free service that will provide you with a more specific analysis. To use this option, please keep a 12" x 12" sample of your damaged flooring, and notify your Allstate adjuster that you would like the additional analysis.

Because your house was built prior to 1978, you need to be aware of the following: To protect against risk of lead paint, on April 22, 2008, the EPA issued a rule requiring the use of lead safe practices and other actions aimed at preventing lead poisoning. Under the rule, beginning in April 2010, contractors performing renovation, repair and painting projects that disturb lead-based paint in homes built before 1978 must be certified and must follow specific work practices to prevent lead contamination. In the event of a covered loss, we will allow the reasonable cost associated with specific work practices outlined by the EPA or local authority. These costs will be considered once they are incurred and submitted for our review.
